Summary —

Azure and .NET Developer with experience in building scalable backend applications and RESTful APIs using ASP.NET Core. Skilled in implementing cloud solutions with Azure services including Logic Apps, Function Apps, Service Bus, Azure Data Factory, and API Management. Focused on developing secure, high-performance applications aligned with microservices architecture.

Education

Lovely Professional University

Bachelor of Technology in Computer Science; CGPA: 8.79

Nano Junior College

Intermediate; Percentage: 98.2%

Jawahar Navodaya Vidyalaya

Tenth; Percentage: 96.4%

2020 – 2024

Phagwara, Punjab

Apr 2018 – Mar 2019

Hyderabad, Telangana

Jun 2017 – Mar 2018

Warangal, Telangana

Skills

Languages C#.Net, Python, Java

Backend ASP.NET Core Web API, RESTful Services, Microservices

Cloud Microsoft Azure (Logic Apps, Function Apps)

Azure Services Azure Data Factory, Azure API Management, Azure SQL Database

Databases SQL Server, MySQL

Tools Git, VS Code, Docker, Power BI

Experience

Capgemini Technology Services India Limited

Jul 2025 – Present

Software Engineer – Azure & .NET Developer

- Developed cloud-based solutions using .NET and Microsoft Azure
- Worked with Logic Apps, Function Apps, Service Bus, ADF, and APIM
- Built real-time use cases for API integrations and data pipelines
- Developed scalable APIs using ASP.NET Core (microservices architecture)

Capgemini Technology Services India Limited

Jan 2025 – Jun 2025

Intern – .NET Backend Development

- Completed training in .NET backend development using C#
- Built Web APIs handling CRUD and business logic
- Integrated Azure services like Service Bus, Logic Apps, Event Grid, Function Apps
- Learned scalable microservices design aligned with enterprise standards

Certifications

- | | |
|--|---------------------|
| – Generative AI Leader Certification – Google | Mar 2026 – Mar 2029 |
| – Microsoft Certified: Azure AI Engineer Associate | Mar 2026 – Mar 2027 |
| – Microsoft Certified: Azure Fundamentals | Jan 2026 |
| – Microsoft Certified: Azure AI Fundamentals | Oct 2022 |

Projects

Azure Data Factory ETL Pipeline Implementation

Feb 2026 – Mar 2026

- Built ETL pipeline using Azure Data Factory with Azure SQL Database (source) and Blob Storage (sink)
- Implemented Copy and Data Flow activities for data movement and processing
- Applied transformations using Derived Column to enhance data quality

API Management Implementation for Car Wash Backend

Jan 2026 – Feb 2026

- Created and configured Azure API Management (APIM) for backend APIs
- Integrated Car Wash APIs and implemented rate limiting, JWT validation, and header policies
- Configured error handling policies to improve API security and reliability

On-Demand Car Wash Backend Management System

Feb 2025

- Developed REST APIs using ASP.NET Core
- Used layered architecture (Controller-Service-Repository)
- Integrated SQL Server with Entity Framework Core
- Followed SOLID principles and Swagger documentation
- GitHub: <https://github.com/aravindkontham/On-Demand-Car-Wash>
